Kelly Tomblin

From a coal miner's daughter in West Virginia through the ranks of the multinational GDF Suez/International Power company to taking the helm at the Jamaica Public Service Company Ltd., Kelly Tomblin has proven herself as one of the most dynamic and accomplished leaders in the energy industry.

With 25-years of diverse leadership experience in the regulated utility and independent energy sectors in the US, Jamaica, Latin America and the U.K., her expansive experience includes generation and transmission and distribution businesses, as well as renewable development and energy services and sales.

As a visionary, and risk taker, her innovative vision to do power differently is what sets Kelly apart. When she accepted the president and CEO position with the Jamaica Public Service Company Ltd, she was challenged with escalating energy prices, a consumer satisfaction score hovering in the 20's and deep-seated economic challenges. Within two years she was able to turn that public image around, by aligning her employees on her vision of "leading an energy revolution for the growth and prosperity for every Jamaican".

Kelly passionately believes that healthy organizations expand the human potential. Under her leadership, the company started a holistic approach to wellness and instituted a number of personal development initiatives designed to help employees discover and deliver their brilliance.

Kelly is a well-respected advocate for women and diversity. She brings a steadfast commitment to improving communities and the lives of others. She is a United Way Platinum Award recipient and has established Stewart's Caring Place, a support center for victims of cancer. In addition, she successfully launched the JPS Foundation, a non-profit organization which supports schools and child nutrition. She sits on the Board of American Friends of Jamaica, another worthwhile organization coordinating charitable projects throughout Jamaica, and holds a position on the Board for Junior Achievement. As a founder of the Energy Clubs, Kelly has helped educate students on the opportunities and challenges within the Energy Sector. Her proudest achievement is founding Jamaica's Women in Energy, an organization designed to uplift women within the energy industry.
